TODOS SANTOS · JANUARY 10, 2026

The Biodynamic *Farm Organism*

A day with Natalie McGill and Stewart Lundy

PALMA SERENA · BAJA CALIFORNIA SUR

Saturday, January 10 · 10 a.m.–5 p.m.

ARCHIVE EDITION

A day on *the living farm.*

Join Natalie McGill and Stewart Lundy for a day of talks, practical activities, and food from the garden. We consider the farm as a living organism, attending to the relationships among soil, plants, animals, and the wider rhythms of the landscape.

How do we read a place? How do our daily choices strengthen the life of a farm? The gathering brings these questions into conversation with their experience at Perennial Roots in Virginia.

A day for learning, conversation, and a shared meal.

SATURDAY, JANUARY 10, 2026

10 a.m.–5 p.m.
Palma Serena · Todos Santos

Life in relationship.

From soil to supper.

01 ## The astronomical calendar

Reading astronomical rhythms as a guide for farm management.

02 ## Soil fertility

Biodynamic farming and the care of the living soil.

03 ## Animals

The role of animals within the agricultural organism.

04 ## Food from the garden

The harvest, its preparation, and the shared table.

With Natalie McGill & Stewart Lundy

Farmers at Perennial Roots, Accomac, Virginia, since 2010. Their work brings together a market garden, a community supported agriculture program, and livestock.
